

Glitz and Glam at the Science Formal *by Kelsey Johnson*

The annual Carleton Science Winter Formal had science and math students dressed in their finery this month, as part of a high class evening of dining and dancing.

Held at the prestigious Fairmont Chateau Laurier, the evening is considered the highlight of a number of faculty's social calendars. This year's formal saw just under 200 guests for dinner, with another 70 students arriving later for the dance.

Organized by a handful of math and science students, students on the event committee say the formal is a chance to celebrate everything and anything science, with fellow students and faculty.

"It was great seeing all our hard work pay off and come together in a spectacular night," says Math Society President Michelle Kovesi.

"It was really fun dressing up and seeing everyone looking so fancy."

Kelsey Johnson is a Carleton Journalism student who finds herself hanging out with Math people too much - and loves every minute of it.

Exciting News!

Thanks to money obtained from CUSA, we have now purchased a math society laptop!

Mathsoc members may borrow the laptop for a maximum of 3 hours at a time. If you would like to borrow it, find one of the execs to sign it out. You are fully responsible for any damage that may occur to the laptop while it is signed out under your name.

Upcoming Events!!!

ROCK CLIMBING
